Summary

Data analyst with 5 years of experience in e-commerce analytics, experimentation and forecasting. Built the demand forecast that now drives purchasing for 3,000 SKUs.

Work Experience

Senior Data Analyst, Kirana Mart Online 04/2022 – Present

- Built a weekly demand forecast in Python (Prophet) for 3,000 SKUs, reducing stock-outs by 18%.
- Designed and analysed 40+ A/B tests on checkout flows, adding an estimated ₹2.1 crore in annual revenue.
- Created Tableau dashboards used daily by 60 category managers.

Data Analyst, Saffron Travel Technologies 07/2019 – 03/2022

- Wrote SQL pipelines in BigQuery that consolidated 7 booking sources into one reporting layer.
- Cut weekly reporting effort by 12 hours by automating Excel reports with Python and Airflow.
- Segmented 1.4 million customers using k-means clustering to target loyalty campaigns.

Business Analyst Intern, Deccan Fintech Labs 01/2019 – 06/2019

- Documented 25 loan-origination processes and mapped them to system requirements.
