Executive Summary

Engineering leader with 18 years of experience in mobility, e-commerce and insurance software. Has built and scaled teams from 9 to 48 engineers, owned platforms handling €400m in annual transactions and led three large-scale migrations to the cloud. Known for pairing delivery discipline with strong engineering culture.

Professional Experience

Spreewald Mobility GmbH, Berlin Apr 2020 – Present
Director of Engineering

- Lead 6 teams (48 engineers) building the routing and pricing platform for 2.5 million monthly riders.
- Cut cloud spend by €1.1m a year through rightsizing and reserved capacity planning.
- Introduced quarterly planning and DORA metrics; deployment frequency rose from weekly to 30 per day.
- Hired 22 engineers and 4 engineering managers, with 92% 12-month retention.
- Sponsored the migration of the monolith into 14 domain services without a customer-facing outage.

Hanse Commerce AG, Hamburg Jan 2016 – Mar 2020
Engineering Manager

- Managed 3 teams responsible for checkout and payments handling €400m GMV a year.
- Reduced checkout errors by 63% by introducing end-to-end monitoring and SLOs.
- Ran the PCI DSS Level 1 certification programme across 9 services.
- Grew the team from 9 to 24 engineers while keeping on-call load under 2 pages a week.

Hanse Commerce AG, Hamburg Jun 2012 – Dec 2015
Senior Software Engineer

- Built the product search service in Java and Elasticsearch, serving 1,800 queries per second.
- Designed the A/B testing framework used for 300+ experiments a year.
- Led the move from SVN to Git and trunk-based development for 60 developers.

Rheinland Systems, Cologne Sep 2008 – May 2012
Software Engineer

- Developed insurance claims workflows in Java EE for 4 regional insurers.
- Wrote a batch reconciliation job that cut nightly runtime from 5 hours to 40 minutes.
- Maintained an Oracle database of 120 million policy records.

Nordlicht Software, Bremen Oct 2006 – Aug 2008
Junior Developer

- Implemented reporting modules in Java for logistics customers.
- Fixed over 300 defects in the first year as part of the maintenance team.

Education

Diplom-Informatiker (Computer Science), Technische Universität Berlin 2001 – 2006

Skills

Engineering Leadership, Java, Kotlin, Go, AWS, Kubernetes, Kafka, PostgreSQL, Microservices, SRE, OKRs, Hiring, Budget Planning

Languages

German (native), English (C2), French (B1)

Publications

- "Scaling Checkout to Black Friday", talk at code.talks Hamburg (2018)
- "Domain Services Without the Downtime", InfoQ article (2022)

Volunteer

Mentor at ReDI School of Digital Integration, Berlin (2019 – Present): coach 3 career changers per cohort.
