Amara Okonkwo

Senior Product Designer at Brightpath Health | Design Systems, Accessibility (WCAG) & Healthcare UX | Ex-Shopify

Toronto, Ontario, Canada

Summary

I design healthcare products that patients and clinicians can actually use. For the past nine years I have worked across e-commerce and digital health, most recently leading the design system that now powers 14 patient-facing products at Brightpath Health.

What I bring: a research-first process, accessibility built in from the first sketch rather than bolted on, and close partnership with engineering. At Brightpath I cut appointment-booking drop-off by 31% and helped the company pass its first external WCAG 2.2 AA audit.

How I work: I start with the people who will use the product, often older patients and busy clinicians, and test early with real tasks. I write design documentation engineers actually read, and I measure success with outcomes such as completion rates and support volume rather than screens shipped.

• Design systems: Figma libraries, tokens and React components used by 9 teams
• Accessibility: WCAG 2.2 AA audits, screen-reader testing, inclusive research
• Research: 40+ moderated sessions a year, journey mapping, service blueprints

I'm open to conversations about senior and lead design roles in health and public-sector products. Portfolio and case studies: amaraokonkwo.design

Experience

Brightpath Health

Senior Product Designer

March 2022 - Present (4 years 8 months)
Toronto, Ontario, Canada

Lead designer for the patient app and the Lumen design system (120+ components, used by 9 product teams).

• Redesigned appointment booking; drop-off fell 31% and support calls about booking fell by a third.
• Ran 40+ usability sessions with patients over 65 and turned findings into a reusable accessibility checklist.
• Partnered with engineering to ship tokens in Figma and React, cutting UI bug reports by 45%.

Shopify

Product Designer

January 2019 - February 2022 (3 years 2 months)

Ottawa, Ontario, Canada

Designed merchant onboarding flows for Shopify Payments in 6 markets.

• Simplified identity verification, raising first-week activation from 58% to 71%.

• Built the onboarding pattern library adopted by three other teams.

Northlake Digital

UX Designer

May 2017 - December 2018 (1 year 8 months)

Toronto, Ontario, Canada

Designed web and mobile experiences for retail and banking clients; led research for a credit-union app rated 4.7 in the App Store.

Ryerson University

Research Assistant, Human-Computer Interaction Lab

January 2016 - April 2017 (1 year 4 months)

Toronto, Ontario, Canada

Ran remote usability studies for an accessible transit-planning prototype with 24 participants who use screen readers.

Education

Toronto Metropolitan University

Master of Digital Media, Human-Computer Interaction · (2015 - 2017)

University of Lagos

Bachelor of Science - BS, Computer Science · (2009 - 2013)
