Hamza Rashidi

Founder & CEO at Kestrelworks | Software Engineering Student | Building tools for small accounting firms

Lahore, Punjab, Pakistan

Summary

I'm the Founder & CEO of Kestrelworks, a small software studio building practical tools for accounting and audit firms in Pakistan. I started it after a summer inside a mid-sized audit practice, where I watched talented people lose whole evenings to copying numbers between spreadsheets, chasing clients for documents and rebuilding the same working papers every year.

Kestrelworks turns that pain into software — document request portals, reconciliation helpers and templates that remember last year's work. Alongside the company I'm studying Software Engineering full time, which keeps me close to new ideas and to a pool of classmates who want to ship real products. I care about clear interfaces, honest estimates and small teams that own their work end to end. If you run a practice that still lives in email threads and shared drives, or you are a student who wants to build something useful, I would love to hear from you — my inbox is open.

Experience

Kestrelworks

Founder & CEO

August 2026 - Present (3 months)
Lahore, Punjab, Pakistan

Started a software studio building document-request and reconciliation tools for small accounting firms.

• Shipped the first client portal; piloting it with three local practices.
• Run discovery interviews with partners and audit staff to choose what we build next.
• Handle sales, onboarding and support for pilot firms.

Hartley Whitcombe Okafor Lindqvist & Partners LLP (a member firm of the Meridian Accounting Network)

Summer Intern, Audit and Assurance

June 2025 - August 2025 (3 months)
48, Block C-2 Phase 3 Garden Town, Lahore, Pakistan

Education

Ravi Valley Institute of Technology

Bachelor of Science, Software Engineering · (September 2024 - September 2028)
